

Below is a list of our current capabilities. We currently hold NADCAP, AS9100, ISO, and ITAR certifications. Our business was established in 1992 and has been adding capabilities and prime customers over the past 29 years. We are known in the industry for high quality and quick turns. With the two facilities it enables us to find the best facility to support our customers and their products at the highest levels. Having so many processes in house allows our customers to save time and money with minimizing the outsourcing to multiple companies. Please let me know if you would like me to elaborate on any of the finishes that we offer.
